

Subcontractor Prequalification

Do you want to work with GLJ Builders? The Subcontractors that we partner with are invaluable to us and we hope to build a mutually beneficial long-term relationship with you.

Construction is a risky business. Subcontractor Prequalification is a process where a Subcontractor's financial strength, experience, character, and their ability to perform are analyzed. This prequalification process is the first step in ensuring a successful project by minimizing risks. Only complete packages will be reviewed and considered. Upon acceptance, your company will be placed on our Subcontractor Bid List.

The following must be completed in order to bid on our projects:

- 1) Subcontractor Prequalification Questionnaire
- 2) Project References and Information Form
- 3) Subcontractor Safety Questionnaire

Insurance Requirements

Subcontractors must be able to meet our insurance requirements in order to bid on our projects. A list of our insurance requirements as outlined in our Subcontract Agreement is included in this package as well as a Sample Certificate of Insurance and Additional Insured Endorsement.

Please mail your completed package to:
